PROFESSIONAL SUMMARY

Frontend Developer with production internship experience delivering a live React.js e-commerce platform end-to-end as the frontend engineer. Proficient in JavaScript (ES6+), React.js, Redux, Context API, Tailwind CSS, and REST API integration, with a strong focus on UI Development, component-driven SPA architecture, and performance optimization through lazy loading and code splitting. Skilled in implementing JWT authentication, Role-Based Access Control (RBAC), protected routes, and i18n. Seeking a Frontend Developer (React.js) role to own UI development and contribute to product delivery from day one.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Redux
Backend: Node.js, MongoDB
Tools: Git, GitHub

PROFESSIONAL EXPERIENCE

Frontend Developer Intern — MyVyaz Botmatic Solution Pvt. Ltd., Pune *Jan 2026 – Apr 2026*

- Delivered a production React.js e-commerce platform as the Frontend Developer for a Mexico-based international client, owning UI architecture, REST API integration, and Vercel deployment across a 3-month delivery cycle.
- Designed 5 core feature modules — Product Catalogue, Order Management, Admin Dashboard, User Management, and RBAC — alongside a reusable component library used across the application.
- Implemented JWT authentication and Role-Based Access Control to secure user sessions and enforce granular permissions across admin and customer flows.
- Optimized application performance using lazy loading, route-level code splitting, and React.memo — reducing initial bundle size and improving perceived load time.
- Integrated RESTful APIs with Axios and enabled multi-language support using i18n, with responsive Tailwind CSS layouts, handling loading, error, and edge-case states for a resilient multi-language UI.

PROJECTS

Zeux LifeSciences — Pharma E-Commerce Portal | *React.js, Redux, Tailwind CSS, REST APIs, JWT, i18n, Vite, Vercel*

- Architected SPA frontend with React.js and Redux for global state management, structuring routing and a reusable component library to scale across 5 core feature modules.
- Secured application access using JWT authentication and Role-Based Access Control, enabling protected routes and granular admin vs. customer permissions.
- Developed real-time data visualization dashboards with optimistic UI updates; configured Vite with lazy loading and route-level code splitting.

MediCheck AI — Symptom Checker SPA | Live Demo | *React 19, Vite, Tailwind CSS v4, Context API, React Router v7, Recharts*

- Engineered a symptom-to-condition mapping engine covering 30+ symptoms and 20+ medical conditions with Low/Medium/High risk stratification.
- Integrated client-side JWT authentication using Context API, enabling protected routes with React Router v7 and persistent state via localStorage to deliver a complete frontend auth flow without backend dependency.
- Designed a responsive multi-page dashboard (Dashboard, Symptom Checker, History, Profile) with Recharts (pie + bar) visualizations and react-hot-toast notifications; deployed to Vercel.

EDUCATION

BSc Information Technology — DBJ College, Chiplun *Jun 2021 – Jun 2024*
Full-Stack Web Development Certificate — BitCode Technologies Pvt. Ltd. *Jun 2024 – Sep 2024*
